SUMMARY

I am a full-stack software engineer with 6+ years of music business, marketing, and product management experience. Due to my experience in music business and marketing, I am uniquely positioned to work efficiently with the product team and develop responsive applications with the end user in mind.

SKILLS

Proficient: JavaScript, React, HTML, CSS, Python, Express, MongoDB/Mongoose, Django, PostgreSQL, RESTful APIs, Node.js, Sass, Heroku, GitHub/Git, Axios, AJAX

Exposure: Babel, Passport, bcrypt, Computer Science Fundamentals

Other Relevant Skills: Scrum, Asana, Trello, Notion

PROJECTS

ARTISTKEY - *allows users to keep track of the monetary performance of songs released on Spotify*

Full-Stack Web Application | [Front End Repo](#) | [Back End Repo](#) | [Deployed App](#)

- A full-stack SPA with HTML, CSS, React, and Bootstrap for frontend and Python, Django, and PostgreSQL for backend
- Basic user authentication required for user to perform CRUD actions on two resources
- Custom RESTful API

DEVSPOT - *social media site for developers*

Full-Stack Web Application | [Front End Repo](#) | [Back End Repo](#) | [Deployed App](#)

- Worked with 3 other developers remotely to create a social media application for web developers
- Allows users to CRUD on a database hosted on Heroku to create a user profile and post to their wall
- Front-end built with React and React-Bootstrap
- Back-end built with Express, MongoDB, Mongoose, and Passport

EFFERVESS - *a beer recipe storage app*

Full-Stack Web Application | [Front End Repo](#) | [Back End Repo](#) | [Deployed App](#)

- A full-stack SPA with HTML, CSS, Bootstrap, and Handlebars for front-end and MongoDB, Mongoose, and Express for the backend
- Basic user authentication required for user to perform CRUD actions on a resource
- Custom RESTful API

TIC-TAC-TOE - *play against yourself in the popular game tic-tac-toe*

Game Project | [Repo](#) | [Deployed App](#)

- Developed a front-end JavaScript application with HTML and CSS that connects to a back-end hosted on Heroku
- Deployed client allows users to perform authentication actions and CRUD a database hosted on Heroku through AJAX requests
- Designed responsive UX/UI for the gameboard with custom game logic

ADDITIONAL EXPERIENCE

SOFTWARE ENGINEERING IMMERSIVE FELLOW, General Assembly, 2020

- 12 week, 600+ hour career accelerator
- Developed 4 full-stack applications requiring user authentication, database interaction, and CRUD actions using multiple frameworks, languages, and libraries
- Learned version control and working remotely with a team through GitHub and Git

CONSULTANT, The Killers & Other Artists, 2019 - 2020

- Client facing project management, working directly with The Killers on variety of music business fields (publishing, touring, merchandise, pr/publicity, radio promo, brand relationships, recorded music, production, and more)
- Product managed The Killers album "Imploding The Mirage" with Island Records

DIGITAL & BRAND MANAGER, Heroic Music Group, 2017 - 2019

- Maintained brand/image of 4 high-profile electronic musicians through brand partnerships and collaborations
- Led business strategy for 2 major electronic musicians (Unlike Pluto & Fytech)
- Managed team of 4 marketing assistants to aid in the execution of branded marketing campaigns
